Profile Summary

I have extensive experience in developing advanced software solutions that optimize performance and incorporate innovative features. With a Bachelor's degree in Computer Engineering, I've honed my skills in Laravel and JavaScript for both back-end and front-end development. My passion for technology drives me to tackle complex issues, enhance designs, and improve API efficiencies, all focused on user satisfaction and operational excellence. I adapt well to new technologies and am motivated to automate integration and deployment processes, believing that artificial intelligence can significantly transform our operations.

Key Skills

- PHP
- Laravel
- Lumen
- Slim
- Codeigniter
- HTML
- Java Script
- CSS
- React.js
- Vue.js
- MySQL
- Maria DB
- JQuery
- Rest API
- Elastic Search
- Node.js
- MongoDB
- Shell
- PHPUnit
- Git
- Jira
- AWS
- Ngnix
- Apache
- Docker
- Tailwind CSS
- Vanilla JS
- CI/CD

Education

B.E. – Computer Engineering
2016
SINHGAD ACADEMY OF
ENGINEERING
Grade - 66%

Diploma – Computer
Engineering
2013
BALAJI POLYTECHNIC
Grade - 75-79.9%

SSC/ 10th
2009
SHIKSHAN PRASARAK
MANDAL
Grade - 65-69.9%

Work Experience

Senior Consultant , Optimum Info system	2023 - 2024
Laravel Developer , Enrich Hair and Skin Solutions	2022 - 2023
Software Engineer , Dynamisch IT	2021 - 2022
Software Engineer , NeoSoft Technologies	2020 - 2021
Full Stack Developer , SecureLayer 7 Technologies	2019 - 2020
Software Engineer , Skylex Technologies	2016 - 2018

Projects

Bugdazz

Pentest as a service

I created Bugdazz, a vulnerability management system that simplifies the integration of multiple security tools, such as JIRA, White Source, and Bugzilla, for security consultants, making their work more effective.

Authsafe

Security

Authsafe is a great solution for preventing account takeovers. It protects against malicious actors, detects and neutralizes bots, blocks malicious activity, and identifies suspicious behavior. Its cognitive user behavior engine

distinguishes between legitimate users and malicious actors, offering a superior experience for legitimate users without requiring CAPTCHAs. I highly recommend Authsafe for strong account takeover prevention.

Ecourier

Delivery Platform

I created Ecourier, a web portal and mobile application for managing courier services in Turkey. The system caters to various roles and handles packages with different services based on customer preferences. It allows the creation of shipments with full address mapping and finds the shortest possible route for vehicles. The tools and technologies used include Laravel, PHP-Excel, HTML5, CSS3, React.js, POSTMAN, REST APIs, Data tables MySQL 5.0, Repository Pattern, PTA X server, Google Map API, and live tracking for delivery executives.

Terap

Therapists Platform/ Health

Neosoft Technologies has created a platform connecting therapists with individuals seeking mental health support. Therapists can post content and conduct live sessions, while users can access content based on their subscriptions. The project uses Laravel, Chart.js, PHP-Excel, HTML5, CSS, Postman, and MySQL.

Cash Converters Loyalty (GESTAZION)

Lottery and game platform

A sophisticated online business gamification platform has been developed to enrich the training and motivation of your employees. Notable features include a comprehensive shopping tag that influences purchasing decisions, rapid multiscreen promotions, and a fully customizable online micro-promotions catalogue.

Prerna Union Bank

Banking/Finance/HR

I was responsible for modernizing HR systems for a leading bank as a software engineer. My role included implementing cutting-edge HR policies through technological solutions, which involved developing responsive views, designing UI/UX for the dashboard, and adhering to business policy guidelines. The technological framework incorporated frameworks such as CI, Postman, and PHP Unit

Real Time Clinical Trial Management System (RTCTMS)

Medical Research / Health/ Patient Data Analysis Platform

The Real-time Management System supervises clinical research sites, site networks, CROs, and sponsors' data through advanced software systems and exceptional customer service. The project uses Laravel, Grid.js, React.js, HTML5, CSS, JavaScript, Postman, and MySQL.

Encube

Lifestyle and Commerce Platform

Encube offers an integrated content management system (CMS), web portal, and mobile application focused on optimizing service appointments, product transactions, and managing salon and home services. Built on the Laravel Lumen micro-framework, it incorporates technologies like Magento, Node.js, Elastic Search, and SQL. Encube also includes inventory management, CRON job scheduling, REST API integration, and performance optimization.

Junior Adventure Group (JAG)

Child Care

The Junior Adventure Group comprises a suite of applications, including web portals and mobile applications, designed for booking childcare services in Australia and New Zealand. It is built using Laravel and incorporates various technologies such as Vue.js, Elastic Search, and SQL. The primary Laravel application is named Panipuri, alongside a core PHP application known as prod admin.
